

233.3 INTEGRATED PEST MANAGEMENT

To ensure the health and safety concerns of student, staff and community members, the District shall adopt an integrated pest management plan (IPM):

The IPM plan is a proactive strategy that:

1. Focuses on the long-term prevention or suppression of pest problems through economically sound measures that:
 - a. Protect the health and safety of students and staff;
 - b. Protect the integrity of District buildings and grounds;
 - c. Maintain a productive learning environment; and
 - d. Protect local ecosystem health.
2. Focuses on the prevention of pest problems by working to reduce or eliminate conditions of property construction, operation and maintenance that promote or allow for the establishment, feeding, breeding and proliferation of pest populations or other conditions that are conducive to pests or that create harborage for pests;
3. Incorporates the use of sanitation, structural remediation or habitat manipulation or of mechanical, biological and chemical pest control measures that present a reduced risk or have a low-impact and, for the purpose of mitigating a declared pest emergency, the application of pesticides that are not low-impact pesticides;
4. Includes regular monitoring and inspections to detect pests, pest damage and unsanctioned pesticide usage;
5. Evaluates the need for pest control by identifying acceptable pest population density levels;
6. Monitors and evaluates the effectiveness of pest control measures;
7. Excludes the application of pesticides on a routine schedule for purely preventive purposes, other than applications of pesticides designed to attract or be consumed by pests;
8. Excludes the application of pesticides for purely aesthetic purposes;
9. Includes school staff education about sanitation, monitoring, inspection and pest control measures;
10. Gives preference to the use of nonchemical pest control measures;
11. Allows the use of low-impact pesticides if nonchemical pest control measures are ineffective; and
12. Allows the application of a pesticide that is not a low-impact pesticide only to mitigate a declared pest emergency or if the application is by, or at the direction or order of, a public health official.

The District shall designate the superintendent as the Integrated Pest Management Plan Coordinator[s] give them the authority for overall implementation and evaluation of the IPM plan.

The IPM Plan Coordinator[s] shall:

13. Attend not less than six hours of IPM training each year. The training shall include at least a general review of integrated pest management principles and the requirements of IPM as required by Oregon statute;

14. Ensure appropriate prior notices are given and posted warnings have been placed when pesticide applications are scheduled;

15. Oversee pest prevention efforts;

16. Ensuring identification and evaluation of pest situation;

17. Determine the means of appropriately managing pest damage that will cause the least possible hazard to people, property and the environment;

18. Ensure the proper use and application of pesticide applications when non-pesticide controls have been unsuccessful;

19. Evaluate pest management results; and

20. Keep for at least four years following the application date, records of applied pesticides that include:

- a. A copy of the label;
- b. A copy of the Safety Data Sheet (SDS);
- c. The brand name and USEPA registration number of the product;
- d. The approximate amount and concentration of pesticide applied;
- e. The location of where the pesticide was applied;
- f. The type of application and whether the application was effective;
- g. The name(s) of the person(s) applying the pesticide;
- h. The pesticide applicator's license numbers and pesticide trainee or certificate numbers of the person applying the pesticide;
- i. The dates and times for the placement and removal of warning signs; and
- j. Copies of all required notices given, including the dates the IPM Coordinator gave the notices.

21. Respond to inquires about the IPM plan and refer complainants to the superintendent;

22. Conduct outreach to District staff about the District's IPM plan.

233.3 AR Regulations Regarding the Application of Pesticides

In an attempt to ensure proper control of any pesticides or other potentially hazardous chemicals which might be used or stored on District premises, the following procedures are established. The term “pesticide,” as used in Board policy and this regulation includes insecticides, herbicides, fungicides and rodenticides. The intent is to prevent unnecessary exposure of staff, students or the public to potentially harmful substances.

1. If pesticides or other potentially hazardous chemicals are to be used, the least toxic product(s) will be selected whenever practicable. Products with the lowest percentage of active ingredient(s), least odor possible and with the safest method of application will be selected when there is a choice of products with comparable effectiveness. When practical, a nonchemical or alternative pest control method (e.g., mulching, edging, turf, mowing, hand weeding, etc.) shall be used. Assistance on determining the relative toxicity of products may be obtained from members of the Pesticide Analytical and Response Center (PARC), 503-731-4025, Telecommunication Device for the Deaf (TDD), 503-731-4031 or the National Pesticide Telecommunications Network (NPTN) at 800-858-7378.
2. Storage of pesticides and other potentially hazardous chemicals will be kept to a minimum. Since many chemicals lose effectiveness with storage, and storage further increases risk, only enough of the product for a given application will be purchased. If storage instructions are included, the instructions will be followed explicitly. All such products and the equipment used in the product application will be stored in separate facilities from other activities and especially separated from food products or occupied rooms. All storage facilities will be maintained as a locked area and will be clearly marked as containing pesticides and other potentially hazardous chemicals. Pesticide and other potentially hazardous chemical containers, rinsates and unusable products will be disposed of according to label directions and local regulations.
3. All pesticides and other potentially hazardous chemicals will have complete label instructions, will remain in the original container and the Material Safety Data Sheet (MSDS) information will be on file and readily available to any employee who must handle such materials or who may have been exposed to the product. This information will also be made available to any member of the public upon request.
4. All application of pesticides and other potentially hazardous chemicals will be made in strict compliance with the label instructions and under no circumstance will the product concentrations exceed those specified in the application instructions.

5. Prior to application of any pesticide or other potentially hazardous chemical, a written plan must be approved/denied and signed by the District safety officer. The approved plan and record of application will be maintained on file in the District Office. The plan will minimally contain:
 - a. Purpose of the application;
 - b. Product to be used;
 - c. Formulation of the product;
 - d. Location and extent of the area to be treated;
 - e. Type of equipment to be used;
 - f. Date and time of application;
 - g. The total amount of the product to be used;
 - h. Such provisions as may be necessary to comply with applicable Oregon Occupational Safety and Health Division (OR-OSHA) regulations for the application of chemical substances, including requirements for the use of pesticides on agricultural plants grown for commercial or research purposes. Any warnings that would restrict use of the area following such application also will be part of the plan.

The record will include the purpose of the application, name and amount of the product used, location and area treated, application equipment used, date and time, notification/reentry procedures and authorization, as required.

6. Appropriate protective clothing must be worn and proper equipment used during mixing, applying and cleaning of application equipment. Selection and maintenance of protective clothing and equipment will be made in accordance with product label guidelines and OR-OSHA rules.
7. Pesticides and other potentially hazardous chemicals will be applied at times when staff, students and members of the public are not present in the area to be treated. Application in the presence of those not directly involved in the application of the product is to be avoided even when the product has low toxicity. Any indoor applications will be accomplished after school hours, on a Friday, over a weekend, during a vacation period or other such times, if at all possible. All treated indoor areas must be well ventilated prior to reentry by staff, students or others. When possible, windows should also be opened for a minimum of six hours before staff, students or others return to the area.
8. Staff, students and others, especially those individuals that may be most vulnerable to the effects of pesticides or other potentially hazardous chemicals (e.g., infants, pregnant women, asthmatics, chemically sensitive people, etc.), will be notified of planned applications, as appropriate and practicable. Treated school grounds and buildings will be clearly posted with the date and time of application, product used and reentry instructions as to when treated areas may be used.
9. A District employee(s) responsible for handling and applying pesticides shall have specific pesticide training. An Oregon Pest Control Operator or Public Applicator license may be required. Education and training in integrated pest management may also be required. Employees who apply restricted-use pesticides or use power equipment to apply pesticides shall be licensed as required by the Oregon Department of Agriculture.

10. If the District chooses to contract with a private, state-licensed pest control company, such contractors will be subject to regulations as defined in state law.
11. Any pesticide spill of more than one pound will be immediately reported to the Oregon Emergency Response System at 800-452-0311. The District will maintain as part of its emergencies procedures plan, a plan to respond to, investigate and manage such spills. The plan will include immediate steps to prevent exposure to students, employees and others, protect District property and the environment, agencies to notify, evacuation procedures, spill prevention, cleanup and spill response equipment and incident report form procedures.
12. Injuries or illnesses due to pesticide or other potentially hazardous chemicals must be reported immediately to a supervisor or District official. The individual will be directed to first-aid and/or medical treatment, as appropriate. The District will report such incidents to the Oregon Department of Human Services, Health Services, at 503-731-4025 (after regular business hours call 503-731-4030) and/or OR-OSHA, as required by law.

PESTICIDE APPLICATION PLAN (ATTACHMENT TO 233.3 AR)

Date of planned application: _____ Day of week: _____
 (a weekend or during vacation is best)

Which pesticide(s) will be used? (Attach MSDS if available.)
 (Choose for safety and effectiveness.)

Location/Size of area(s) to be treated:

Who will do the pest control? (circle one) Staff Contractor

Name(s) _____

License #(s) _____

Firm (if applicable) _____

For interior treatment:

Does the building have active ventilation that can be left on after the application?

If not, who is responsible for opening windows at least six hours before staff/students reenter?

For all applications:

Who will post the building or treated grounds with: (1) date of application; (2) pesticide used; and (3) when the area can be used again?

Will pesticides be kept on school grounds? Where?

(Read label carefully!) Keep pesticides locked up and away from occupied areas.

Approved by Superintendent _____ on _____.

School Administrator _____, informed _____.

Other(s) _____, informed _____.
